

Boredoms Biography

There may be no other band in the world that has traced a path quite like Japan's Boredoms. Across nearly 30 years, founder and leader Eye, along with Yoshimi, has taken the band on a cosmic road trip, from the early swamps of chaos through times of tribal frenzy, oceanic tranquility, and massive sonic constructions.

On 07/07/07, BOREDOMS gathered 77 drummers to perform a unique piece and then staged another unique event on 08/08/08 with 88 drummers each at simultaneous concerts in NYC and LA. Since then, they've performed numerous multi-drum events around world, the latest being BOREDOMS with 88 cymbal players at the BARBICAN, London, UK in 2015.

The band has spent the last two decades redefining the concept of noise and experimentation within pop, punk, and psychedelic music. Acknowledging no limits of genre or form, there are no boundaries, no ceiling on the possibilities of experience and expression for the Boredoms. Join the experience and be part of the evolution. It will change how you listen to and how you see music and musical performance.
