

PROMO TEXT GAIA (CH)

The Swiss four piece GAiA plays Electronic Dance Music with live instruments. An early obsession with analog synthesizers is paired with a burning rhythm section of drums and percussion to create a sound full of color & dynamic. In the middle of this ever evolving texture lies a voice that yearns and gets carried away.

With their energetic live shows the boys quickly acquired a cult status in their hometown Lucerne's club scene which led to an invitation to M4Music Festival and nationwide radio airplay among others. Their upcoming new EP shows proof that they are more than ready to stretch the scope of their vision.
